INTRODUCTION

The World Forum of CSDs (WFC) is composed of five regional central securities depositories (CSD) associations, namely Asia-Pacific Central Securities Depositories Group (ACG), Americas' Central Securities Depositories Association (ACSDA), Association of Eurasian Central Securities Depositories (AECSD), Africa & Middle East Depositories Association (AMEDA), and European Central Securities Depositories Association (ECSDA). The total number of member CSDs of WFC is 132.

The associations felt the need for a joint report that provides consolidated data on the CSD industry worldwide and allows them to benchmark themselves broadly to the CSD industry. The World CSD Fact Book project is initiated by the WFC Board with member representation from the five regional associations of CSDs that comprise the WFC. The aim of the book is greater data gathering and considerable time efficiency for all.

The World CSD Fact Book contains data on the following:

- general company information (namely ownership, banking license and number of employees),
- structure of the system it operates (namely account structure, form of custody, type of participants and eligible issues by instrument type),
- its activity and services (namely value of deposit by instrument type, number of participants, number of accounts, number and value of transactions and corporate action events) and
- other important details, such as links with other CSDs and developments/initiatives undertaken by CSDs.

1. PARTICIPATION IN THE FACTBOOK

The First Annual Survey to collect information for the World CSD Fact Book was sent to all WFC members through the respective regional CSD associations. There are 149 WFC Members (unique) of which 132 are CSDs, as some associations also allow for participation of non-CSD members.

Of the 132 Member CSDs, 92 sent responses for the World CSD Fact Book survey. For the year 2017, regional association participation in this initial World CSD Fact Book survey was as follows:

Regional Association	Number of Member CSDs	CSDs that Responded (*)
ACG	27	17
ACSDA	29	17
AECSD	16	15
AMEDA	32	20
ECSDA	38	34

* 9 CSDs belong to more than one regional association.

2. ORGANISATION

2.1. OWNERSHIP MODELS

2.1.1. CSDs have many types of ownership models. We decided to assess the model based on the type of the shareholder they have and on whether or not the shareholder is also a CSD participant. We identified the following eventual categories of shareholders: (1) Federal/National Government, (2) Other Government Bodies, (3) Central Bank, (4) Trading Venues, (5) Clearing Venue that is CCP, (6) Banks, (7) Brokers, (8) Insurance Companies and (9) Private/Other Institutions.

2.1.2. We also asked whether or not shares of the CSD or its holding company are traded, and whether the CSD is part of a group.

OVERVIEW OF THE WORLD'S CSDs

2.1.3. Of the 92 CSDs that responded to the survey, 86 provided details of the shareholding pattern. From the information provided, it is observed that approximately 56% of the CSDs are partially or entirely owned by their Participants. On an average, these Participants hold in excess of 50% of the shareholding in CSD.

2.1.4. More than any other category of owners, CSDs are partially or entirely owned by a Trading Venue. Below this category follows other types of companies and central and commercial banks.

2.1.5. Entities holding 100% shareholding in CSDs

Entities holding 100% shareholding in CSDs

OVERVIEW OF THE WORLD'S CSDs

2.1.6. CSDs where entities hold more than 50% of shareholding in the CSD:

2.1.7. The split of ownership of CSDs that have responded to the survey is provided in the following chart (in percentage). From the chart, it can be seen that Trading Venues are the entities with the largest ownership in CSDs. Apart from Trading Venues, Banks and Central Banks are the biggest shareholders.

2.1.8. There are 22 CSDs whose shares or shares of its holding companies are publicly traded.

OVERVIEW OF THE WORLD'S CSDs

2.1.9. There are 24 CSDs owned or controlled by stock exchange(s), 10 CSDs owned or controlled by a holding company that also owns other FMIs and 8 CSDs owned or controlled by a central bank.

2.2. EMPLOYMENT

2.2.1. Information about full-time employees employed in CSD operations are collected from respective CSDs. Of the 92 CSDs that responded to the survey, 90 provided details.

2.2.2. Approximately 50% (45 CSDs) of the CSDs that responded to the survey have less than 50 full-time employees. Median of full-time employees is 51.

2.2.3. Excluding the two ICSDs, the average CSD has slightly more than 100 employees. This illustrates that the CSD business, unlike other capital market businesses, is more IT-intensive than it is labour-intensive. The figures are spread across a wide range, while the smallest CSDs are run by less than 10 full-time employees.

OVERVIEW OF THE WORLD'S CSDs

2.2.4. Total full-time employees collectively employed by these CSDs are 13,417 as of December 31, 2017. Of this, Euroclear Bank has 2,900 and Clearstream Banking SA has 1,067 employees, which is comprised of more than 30% of the total full-time employees employed by all 90 CSDs that have provided this information.

2.2.5. It is important to note that employee data reflects various corporate structures and arrangements, and in cases where the CSD is not a separate entity (*e.g. when the CSD is a department of the Stock Exchange/ Trading Venue or when the CSD is part of an integrated corporate group with shared services among the different businesses of the group*), the reported figures show the actual number of full-time employees dedicated to the CSD activity rather than the actual number of employees of the corporate entity.

3. LINKS WITH OTHER CSDs

3.1. For the purposes of the Fact Book, we define a “CSD link” as an arrangement between the CSDs that allows a CSD to give its participants access to securities maintained in another CSD, without requiring them to have a direct relationship with the other CSDs, or with a participant of the other CSDs. CSD links are an important means to facilitate cross-border securities transactions in a secure infrastructure environment and to contribute to facilitating cross-border investments.

3.2. Information with respect to links with other CSDs is collected with bifurcation of direct and indirect links. Direct links are when the CSD is a direct participant in another CSD. Indirect links are where CSDs connected to other CSDs via a sub-custodian and/or by relayed links via an intermediating CSD.

3.3. Information on whether the links are inbound or outbound or both was also collected along with the purpose of the links. Inbound links are those links where the clients of other CSD can access the securities maintained in the CSD. Outbound links are those links where clients of one CSD can access the securities maintained in other CSD.

3.4. The prevailing model to establish links with other CSDs is direct links. Most CSDs that have links with other CSDs have established direct links instead of indirect links with other CSDs. There are only two CSDs that have only indirect links.

OVERVIEW OF THE WORLD'S CSDs

3.5. 54 CSDs that have provided the data have either direct or indirect links with other CSDs. Of these, 50 CSDs have direct links (14 CSDs also have indirect links). There are 2 CSDs who have mentioned that they have links with other CSDs, but not provided the details of direct & indirect links.

3.6. Most CSDs (50) with direct links, have both inbound and outbound direct links (41 CSDs). Four CSDs have only inbound links and five CSDs have only outbound links.

3.7. In addition to the settlement of securities, these links are also used for settlement of other financial instruments. Approximately 80% of CSDs links are used for delivery versus payment (DVP), 20% of the links have only free of payment (FOP) settlement.

3.8. CSDs have established 527 links (inbound, outbound or both) with other CSDs. On an average, six links are maintained by each CSD [excluding the top three CSDs in terms of links, that is, SIX SIS Ltd (54 links), Euroclear Bank (55 links), and Clearstream Banking SA (134 links)].

3.9. Member CSDs of ECSDA have the most number of links, with more than 400 direct and indirect links. Of the 34 member CSDs of ECSDA, 25 CSDs have links with other CSDs. This comprised of 78% of total links across all the CSDs. This includes the top three CSDs in terms of links, that is, SIX SIS Ltd, Euroclear Bank and Clearstream Banking SA.

3.10. The number of CSDs that have links with other CSDs and the number of total links these CSDs have established are shown in the following chart.

4. ACCOUNT STRUCTURE

4.1. Currently, different countries have many different legal, regulatory, and operational requirements that determine the securities account structure used by CSD participants and how CSD participants can hold securities on behalf of investors at a CSD. These requirements have differing impacts on asset protection, asset servicing, and operational costs and facilities for end investors and for intermediaries. The various types of account structure models used by CSDs are as follows:

- Beneficial Owner
- Beneficial Owner (Omnibus Accounts can also be opened)
- Omnibus
- Omnibus (Beneficial Owner Account can also be opened)
- Both Beneficial Owner and Omnibus (Hybrid)

4.2. Information about the principal account structure adopted by CSDs is obtained during the survey along with the number of accounts.

4.3. Beneficial Owner account structure as the principal account structure is used by approximately 70% CSDs and is the most common account structure adopted (64 CSDs). Although the most common account structure is Beneficial Owner, of the 64 CSDs, 34 CSDs also allow the opening of Omnibus accounts.

4.4. 28 CSDs (approximately 30%) have Omnibus account structures as the principal account structure. Of these, nine CSDs also offer use of Beneficial Owner accounts.

OVERVIEW OF THE WORLD'S CSDs

4.5. From the information collected from the survey performed for 2017, it is observed that Beneficial Owner account and Hybrid (with the majority of either omnibus or beneficial owner/segregated accounts) structures are most widely used.

5. PARTICIPANTS

5.1. For the purposes of the Fact Book, we define CSD Participants as the financial market intermediaries that interface with the CSD on their own behalf or on behalf of their underlying clients. Information about the types of Participants (namely Custodians, Non-Custodian Banks, Brokers, Asset Managers, and Others) is collected together with the number of Participants with segregation of Participant into Domestic and Non-Domestic.

5.2. Most of CSDs have Custodians, Brokers and other types of Participants.

5.3. Average number of Participants in each CSD is 167.

5.4. Approximately 50% CSDs have Non-Domestic Participants. The percentage of Domestic and Non-Domestic Participants in each Participant category is provided in the following chart:

OVERVIEW OF THE WORLD'S CSDs

5.5. Percentage distribution of various types of Domestic and Non-Domestic Participants are provided in the following chart:

5.6. Brokers are the largest category of Domestic Participants. For Non-Domestic Participants, other/unclassified Participants have the largest representation.

6. FINANCIAL INSTRUMENTS

6.1. CSDs accept various types of financial instruments for deposit and/or settlement. These financial instruments are held in CSDs either in dematerialised or immobilised forms. Financial instruments are categorised as Equities, Collective Investment Vehicles (Funds), Government Debt, Corporate Debt, and Other types of instruments.

6.2. Number of CSDs where these financial instruments are accepted for deposit and/or settlement (along with form of custody namely immobilised and dematerialised) are shown in the following chart:

OVERVIEW OF THE WORLD'S CSDs

6.3. From the information received, it is clear that most CSDs are holding securities in Dematerialised form. However, there are some cases where CSDs continue to hold certain securities in immobilised (physical) form.

6.4. Eligible financial instruments for deposit and/or settlement in CSDs:

- Eligible for deposit and/or settlement
- Non-eligible for deposit and/or settlement

a. All CSDs (89)

b. ACG CSDs

c. ACSDA CSDs

OVERVIEW OF THE WORLD'S CSDs

d. AECSD CSDs

e. AMEDA CSDs

f. ECSDA CSDs

7. DVP SOLUTION

7.1. From the information collected during the survey, it is observed that 92% of the CSDs (82) provide DVP solution facility.

7.2. Of the 82 CSDs, 58 settle using central bank funds and 14 use external commercial bank funds for settlement. Ten CSDs use both commercial bank and central bank funds for settlement.

7.3. Of the 92 CSDs, only 12 (or its group entity) have a banking licence.

8. ELIGIBLE ISSUES

8.1. Number of distinct eligible issues for financial instruments for deposit and/or settlement is obtained by bifurcating financial instrument types as follows: Equities, Collective Investment Vehicles [CIV] (Funds), Debt (Federal/ National Government), Debt (Other Government Bodies), Debt (Corporate), and Others.

8.2. The total number of eligible issues across the 87 responding CSDs is 8.19 Million.

OVERVIEW OF THE WORLD'S CSDs

8.3. The total number of eligible issues across all CSDs that provided the details with bifurcation in financial instruments are provided in the following chart:

**Excluding 2,163,358 eligible issues for which bifurcation data is not available.*

8.4. The percentages of distinct eligible issues for various financial instruments held by member CSDs under the respective regional associations are provided in the following chart (excluding the four CSDs that did not provide bifurcation of number of distinct eligible issues in financial instruments).

OVERVIEW OF THE WORLD'S CSDs

8.5. Percentage of Domestic and Foreign eligible issues categorized by instrument type is provided in the following chart (excluding four CSDs that did not provide details).

9. VALUE OF DEPOSITS

9.1. The value of deposits with CSDs for the various instruments is obtained based on bifurcation in financial instrument types namely Equities, CIV, Debt (Federal/ National Government), Debt (Other Government Bodies), Debt (Corporate), and others.

9.2. Total value of deposits (Custody Value) of all responding CSDs is \$145.80 trillion.

OVERVIEW OF THE WORLD'S CSDs

9.3. By regional association, the value of deposits (\$ trillion) (Custody Value) is provided in the following chart. There are nine CSDs that are members of more than one association. Therefore, their value of deposits is included in each regional association that they are a member of.

9.4. Value of deposits of top CSDs in terms of value.

Total value of deposits (\$ trillion)		145.80
Top x CSDs	Value (\$ trillion)	% of total value
5	94.27	65
10	120.66	83
15	134.17	92
20	139.08	95

10. TRANSACTION VOLUMES

Information about the number of settlement instructions and the value of settlement instructions was included in the survey. Of the 92 CSDs, 82 provided the number of settlement instructions and 79 provided the value of settlement instructions. The total number of settlement instructions and the total value of transactions are as follows:

Particular	Total
Number of settlement instructions	1,806.72 million
Value of settlement instructions	\$ 1,568.99 trillion

OVERVIEW OF THE WORLD'S CSDs

11. CORPORATE ACTIONS

Information about the number of corporate action events and value of corporate actions was included in the survey. Of the 92 CSDs, 76 provided the number of corporate action events and 64 provided the value of corporate actions. The total number of corporate action events and total value of corporate actions are as follows:

Item	Total
Number of corporate action events	10.34 millions
Value of corporate actions	\$ 25.97 trillions

12. CSD SERVICES

Services provided by various CSDs are provided below

INDIVIDUAL CSD FACT SHEETS

❑ BASIC INFORMATION

- **Regional Association** : AMEDA
- **Local Currency** : Algerian Dinar (DZD)
- **Conversion rate into USD** : 1 USD = 115.630 DZD (31-Dec-17)

❑ OWNERSHIP (AS ON 31-Dec-17)

- **CSD is not a part of group of infrastructure of stock exchange, central bank or holding company that owns other FMI.** Algeria CSD is controlled by the Financial Regulatory Market Authority called COSOB.
- **Shareholding Pattern (in %)**

- **Shares of CSD or holding company are not traded publicly.**

❑ MARKET STRUCTURE

- **Principal Account structure** : Omnibus
- **Financial Instruments accepted for deposit and/or settlement**
 - Equities
 - Collective Investment Vehicles
 - Government Debt
 - Corporate Debt
 - Others
- **Financial Instruments held in**
 - Dematerialised form** : Equities, Government Debt and Corporate Debt
 - Immobilised form** : -
- **CSD or its group company does not have banking license**
- **CSD has DVP solution**
- **CSD uses central bank money for settlement**

❑ FULL TIME EMPLOYEES : 27

❑ ANNUAL REVENUE

	in USD (in thousand i.e. '000)

☐ MOST IMPORTANT EVENTS DURING THE PAST YEAR

Algeria CSD, in collaboration with Bolsasy Mercados Españoles (BME) - the operator of all stock Markets and financial systems in Spain- is developping a project for the modernisation of the Algerian Financial System which consists in the analysis, design and implementation of an IT platform for the automation of the data systems of Algeria CSD.

The project is structured in two phases. The first one – which will be developed by BME in collaboration with AFI - covers the design and implementation of a platform for the automation of the data systems of financial market institutions, Algeria Stock Exchange « SGBV », Algeria CSD « Algérie Clearing » and COSOB « the Algerian Regulator ».

This project will lead to the modernisation of the entire value chain of the Algerian stock market.

❑ BASIC INFORMATION

- **Regional Association** : ACSDA
- **Local Currency** : Brazilian Real (BRL)
- **Conversion rate into USD** : 1 USD = 3.320 BRL (31-Dec-17)

❑ OWNERSHIP (AS ON 31-Dec-17)

- CSD is owned or controlled by stock exchange.
- **Shareholding Pattern (in %)**

■ Participant of CSD ■ Non-Participant of CSD

- **Shares of CSD or holding company are publicly traded.**

❑ MARKET STRUCTURE

- **Principal Account structure** : Beneficial Owner

- Triparty Services
- Legal Entity Identifier (LEI) Services
- Valuation Services
- Cash Account and other Cash Services
- e-Voting Platform
- Crowdfunding Platform
- Funds Order Routing Platform
- None of the above
- Others (Please specify): Centralized Investors Registration, Liens and Encumbrances Service Platform, Internet Sales of Treasuries (Tesouro Direto), Emission and cancelation of Exchanged Traded Funds (ETFs)

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- **Liens and Encumbrances Services for financial assets deposited in CSD:** In 2018 B3 started to provide the Liens and Encumbrances Services for financial assets deposited in its environment. That was able due to improvements done at B3's platform and adaptations made on CSD 's normative as requested by Regulators.
- **Remote Voting improvements (e-Voting Platform):** During 2018 B3 CSD performed several improvements in its system of distance voting process. These followed the regulatory guidelines of the Brazilian securities exchange commission (ICVM 594) and other items raised by participants as valuable deliveries. Among these improvements are worth of

highlight: i) Allow Custodians to proceed with FIFO vote instructions through B3 files; ii) The system used by the issuers to register their meetings was reformulated to allow all the needs related to the regulation of the process; iii) Voting module in the B3 CSD system open 24 hours.

- **CSD services for other financial market infrastructure (FMI):** We worked together with other FMI to develop and execute the test plan of the Platform that was developed by B3 to allow other FMI to use B3's CSD services. Depository services to other FMI include: settlement and restriction services, management of equities placed as collateral and coverage of operations to be settled. Among the new functionalities it should be highlighted ISO 20022 message protocols for securities transfers and reconciliation control.
- **Project Settlement in T+2:** Given the implementation of the world's leading markets of cash equity market settlement in two business days (T+2) the adoption of the same cycle in the Brazilian market has become an important item on the initiative agendas of B3 and its participants. During 2018 B3, and its participants, acted in the following agenda on what regards the adoption of the T+2 cycle: i) Definition Project T+2's operational details and business model, ii) Setting up technical working groups based on processes with the objective of manage and support change within its own as well the participant's solutions. Revision and improvement of procedures and solutions should imply in enhancement of STP process throughout the whole chain of participants involved in Brazilian market post-trade routines. The Settlement in T+2 is expected to begin in May, 2019.
- **Provisioned cash events transfers:** This new service in B3 CSD system allowed Custodians to transfer provisioned corporate cash events with change of ownership. This delivery improves the operational flow of the participants when in the need of closing a specific account, usually related to investment funds and non-resident Investors, due to liquidation or closure of activities of the investor in the country. This functionality also follows the guidelines placed forward by the Brazilian securities commission exchange (ICVM 560/2014 and ICVM 555/2014).
- **Brazilian Central Bank BACENJUD 2.0:** Brazilian Central Bank system BACENJUD operates as instrument platform of the communication between judiciary and the financial institutions with technical intermediation of the Brazilian Central bank, where judicial orders are of responsibility and zeal of the judiciary. The participant's financial institutions are responsible to obey the orders which imply in the blockage of a given security or equivalent financial amount can be transmitted from the legal judicial body. Flowing enhancement performed by the Brazilian Central Bank on the BACENJUD system as well as the increase in the number and categories of institutions which are now connected through BACENJUD. The B3 central securities depository delivered new functionalities in 2018 which allowed Custodians to handle possible orders for judicial blockades.
- **Improvements in Government Treasuries Bonds Operation (Tesouro Direto):** During the year of 2018 B3 CSD, responsible for Internet Sales of Government Treasuries bonds system platform, delivered a series of improvement to market participants related to this product. Among these improvements are worth of highlight:

i) The purchase settlement flow was altered from T + 2 to T + 1 following a request from the Brazilian National Direto's investor regarding the negotiation and also to adapt the product to the large part of the fixed income products available in the market; Treasury. The main objective of this delivery was to give more transparency to the Tesouro ii) the Tesouro Direto's App was released. The new App had the objective of modernizing investors' access to the Tesouro Direto trading platform; iii) B3 CSD delivered a service for the blocking of public bonds by judicial request for service to BACENJUD, attendance at a request from the Central Bank of Brazil, where Tesouro Direto started to offer financial institutions a new service for blocking securities TD by request.

❑ BASIC INFORMATION

- **Regional Association :** ACSDA
- **Local Currency :** Bahamian Dollar (BSD)
- **Conversion rate into USD :** 1 USD = 1.000 BSD (31-Dec-17)

MOST IMPORTANT EVENTS DURING THE PAST YEAR

Our CSD was accepted as a member of the Americas' Central Securities Depositories Association (ACSDA). This was an important step because we plan to utilize membership in ACSDA as a major resource for further growth and development of our unique business, to get information on best practices for CSDs in the region and around the world and to build lasting business contacts and relationships.

❑ BASIC INFORMATION

- **Regional Association** : ACSDA
- **Local Currency** : US Dollar (USD)

❑ OWNERSHIP (AS ON 31-Dec-17)

- CSD is owned or controlled by central bank.

- Shareholding Pattern (in %)

- Shares of CSD or holding company are not traded publicly.

❑ MARKET STRUCTURE

- **Principal Account structure** : Beneficial Owner (Omnibus Accounts can also be opened)

- Financial Instruments accepted for deposit and/or settlement

- Equities
- Collective Investment Vehicles
- Government Debt
- Corporate Debt
- Others

- Financial Instruments held in

- Dematerialised form** Equities, Collective Investment Vehicles and Corporate Debt
- Immobilised form** -

- CSD or its group company does not have banking license

- CSD has DVP solution

- CSD uses central bank money for settlement

❑ FULL TIME EMPLOYEES : 16

❑ ANNUAL REVENUE

MOST IMPORTANT EVENTS DURING THE PAST YEAR

Caja de Valores and BYMA has introduced the short selling and securities lending in the Argentinian market. The new securities lending programme is available on BYMA, allowing short selling of both equity and fixed income.

Loans would be overnight to cover fails, and for a maximum of two months. Brokers are responsible to post the collateral, with the central counterparty (CCP) guaranteeing the loans. Finally, CVSA keeps track of securities on-loan on the lender's account, as well managing corporate actions.

DVP settlement on the domestic transactions was implemented on 05/02/18, when one leg is an ICSD. The next step is to include the domestic settlement to all other domestic participants.

IT developments:

CVSA have sent an RFI for the redesign of the CSD custody system. The proposals received are being evaluated. The estimated implementation term is from 3 to 4 years.

Local legislation developments:

The National Securities Commission (CNV): Has approved The Securities lending programme and short selling.

❑ BASIC INFORMATION

MOST IMPORTANT EVENTS DURING THE PAST YEAR

The most important projects for CDCC are:

- Regulation (EU) N° 909/2014 of the European Parliament and of the Council of 23 July 2014 on improving securities settlement in the European Union and on central securities depositories and amending Directives 98/26/EC and 2014/65/EU and Regulation (EU) No 236/2012 (CSDR)
- Regulation (EU) No 648/2012 on OTC derivatives, central counterparties and trade repositories (EMIR)

These projects include harmonization processes to obtain the work licence.

❑ BASIC INFORMATION

MOST IMPORTANT EVENTS DURING THE PAST YEAR

The CDS has achieved a Profit after Tax of Rs 46.184 M in 2018-2019 which represents an increase of 40.3% compared to last year and which is the second all-time high in terms of profitability achieved by the Company since its inception. The main factors that have contributed to this excellent performance are as follows:

- Substantial increase in market turnover compared to last year mainly due to the relatively high number of takeovers on the market (around 19% of the total turnover came from transactions relating to takeovers)
- Income from international projects
- Significant increase in the number of International Securities Identification Numbers generated (CDS is the National Numbering Agency for Mauritius and a member of the Association of National Numbering Agencies)
- New listings on the exchange
- Good employee productivity
- Costs kept under control

It is important to note that the Company earned an amount of Rs 17.275 M which represents around 20.4% of total revenue, from sources other than the depository, clearing and settlement services which is its core business. These other sources of income include investment income, fees from international projects, IT outsourcing services, fees on issue of International Securities Identification Numbers and provision of registry software service. The revenue from other sources has increased by 23.1% compared to last year.

A major achievement during 2017-2018 was on the international front with the successful completion of a major project at an African stock exchange which went live in December 2017. We provided consultancy services to this African exchange for the replacement of its Central Securities Depository (CSD) system and its Automated Trading System (ATS) in order to meet new market requirements, keep pace with functional and technological developments in the securities industry and comply with international standards. The services provided by CDS in this project include the following:

- Prepare, finalise and issue Request For Proposal (RFP)
- Evaluate proposals to RFP, demo from vendors of ATS and CSD System and select vendor
- Project management - prepare project plan and monitor implementation
- Assist the exchange to organise workshops and awareness campaign for market players
- Assist in User Acceptance Testing of complete system
- Assist in training to exchange, brokers, custodian banks, regulator, registrar and IT Administrators
- Assist in Going live
- Post-live assistance

Our contribution has been a critical success factor in this project and this has been duly acknowledged at all levels.

Another important activity at international level was the participation of the Managing Director on two panel discussion on market infrastructure and liquidity challenges in African markets at the Network Forum Africa meeting that was held in Cape Town in March 2018. This event was attended by more than 130 capital market leaders from an asset management and servicing, investment banking and custody background, and it was a good opportunity to show case the various initiatives taken by the Stock Exchange of Mauritius (SEM) and CDS to internationalize the Mauritian capital market. The CDS is closely following developments regarding the use of blockchain technology in the securities industry and in this context, the Managing Director has been chosen to moderate a panel on this topic at the biennial conference of the World Forum of CSDs (WFC) that will be held in Morocco in April 2019.

With the collaboration of a software development company (Infini Tech) and the SEM, we developed a mobile app (mySEM) that connects to the trading system of the SEM and allows investors to follow the market and place orders to take advantage of trading opportunities in real-time using their smartphone. Investors have access to the order book of the trading system to view market data (Five Best Bid and Ask Orders, Last Traded Price, High Price, Low Price, Total Volume, List of Trades, and Indices) in real-time on their mobile devices. mySEM also allows investors to have online access to their CDS accounts to monitor their account activity. A new fully responsive web application with the same functionalities has also been developed. This new web application runs on all browsers and form factors whereas the previous Internet trading platform could be accessed only with Internet Explorer and did not run on mobile services.

Following requests received from some foreign institutional investors for the extension of the trading hours on the SEM to allow them to better follow the evolution of the daily trading sessions and improve their trading opportunities, the SEM and CDS decided to extend the trading hours by one hour on both the Official Market and DEM with the agreement of all Participants and the approval of the Financial Services Commission. We made changes to the automated trading system of SEM and amended some sections of the CDS Procedures regarding the time at which Contract Notes and Transaction Reports are made available to Participants, and the deadline for making amendments to brokerage rate and client ID, in order to implement the extension of trading hours.

In line with our objective to diversify the range of products that are traded on our market, we collaborated with the SEM and the Bank of Mauritius (BoM), to allow the 3-Year Golden Jubilee Bonds issued by the BoM to be traded on the SEM and settled through CDS. This required changes to the trading and CDS systems especially to automate the restrictions set by BoM. We also collaborated with the SEM and made changes to our systems to implement the SEM Bond Index (SEM-BI) that tracks the performance of rupee and foreign-currency denominated debt instruments that are listed and traded on both the Official Market and the Development & Enterprise Market (DEM).

In September 2017, the SEM won for the fourth time in seven years the "Most Innovative African Stock Exchange of the year Award" at the Ai Institutional Investment Summit and Capital Markets Index Series Awards 2017 organised by Africa investor (Ai), a leading international research and communication group. The Ai Institutional Investment Summit and Capital Markets Index Series Awards is now firmly established as a calendar event and platform to profile African Capital Markets opportunities and success stories to the international investment community. The CDS has contributed significantly to this achievement as it manages the Automated Trading System (ATS) which is the backbone of SEM's trading operations, and has also assisted the SEM to successfully implement a number of new initiatives (dual-currency trading and settlement, new indices etc.) by making the relevant changes to the ATS, the CDS system and the interface between the two systems.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

During the past year CDBL's live operations shifted on to the state of the art HP Superdome2 servers along with rx2800 backup server, 3PAR storage, LTO-7 backup system and other ancillary equipment at the Main and Disaster Recovery (DR) Data Centres. The DR Data Centre is connected online via Dark Fiber with redundant link through which data is being updated simultaneously at both the Data Centres.

An overall up-gradation of CDBL's Data Communication Network has also been completed to match with the new hardware system with latest network routers, switches and new next-generation Firewalls with intruder detection and prevention capability.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

CDC has changed the face of the Capital Market in the country with Central Depository System which brought unprecedented efficiency and transparency to the market processes. With advancements and new products, it is continuing to improve investors' faith in the market processes and ushering the Capital Market into a new phase of development. An exclusive emphasis is being placed on increasing the outreach and for this purpose CDC worked closely with Banks to make it easier for them to start offering Custodial Services. We persuaded SECP to come-up with a simple and lean Account Opening form for Banks. As a result of this effort, 4 Banks have already started offering Custodial Services.

In order to strengthen the investor protection measures and to keep in line with the needs and requirements of the changing business environment, CDC regularly revamps its Regulations. We have also aligned CDC Regulations in line with the Central Depositories (Licensing & Operations) Regulations, 2016 ("Licensing Regulations") issued under the Securities Act, 2015. With the changing state of affairs in the working boundaries of the depository and other related institutions as well as to cater to market demands for more value added services, a number of amendments in the Central Depository Act have been proposed by CDC and submitted to SECP for review.

• I.T. Infrastructure Upgrade

The technology infrastructure at CDC serves as the backbone for all its entire business services. In order to provide highly reliable and secure services to its diversified clientele, CDC continuously upgrades and enhances its technology infrastructure using state-of-the-art products and services. This technology upgrade includes network infrastructure, virtualization for servers and services, migration to tier 3 data center facility, database platform, performance optimization of core business application and internet portals.

- **International Certifications**

CDC successfully achieved ISAE 3402 certification as part of regulatory requirement to demonstrate effectiveness of internal control. ISO 27001 and ISO 22301 certifications' surveillance audits for CDC's Information Security and Business Continuity Management Programs were successfully executed with SGS Pakistan.

- **Investors Facilitation**

- **IBAN Validation and Title Fetching Mechanism**

To facilitate clients in reference to the mandatory requirement of input of International Bank Account Number (IBAN) in the CDS Account, CDC partnered with 1Link (which operates the largest ePayment network in Pakistan) for an arrangement to automatically display the account title on entering the relevant IBAN number in CDS Account Setup Detail. This facilitates the synchronization of account title of investor in the banking system and CDS.

- **Business Innovation / Reforms**

- eIPO

In 2017, CDC launched the eIPO system wherein investors can directly submit IPO applications electronically and can make subscription payments, without visiting any bank branch. At initial stage, banks were reluctant to join CDC eIPO portal but with continuous engagement with SECP, SBP and banks, more and more banks joined our system. Today, through our efforts, 10 leading banks have already joined CES and more are seriously considering the same. Now with 10 banks onboard and some system related changes, the system is getting popular among investors and the usage of CES is also increasing. Initially during our 1st IPO, we processed only 0.2% of the total subscriptions, however, in the last IPO, we processed more than 37% of the total subscriptions.

- eDividend Repository

CDC has recently launched an eDividend Repository by developing a Centralized Cash Dividend Register. This is a free-of-cost service for investors through an internet based web portal and can be accessed from anywhere in the world. It provides investors consolidated data of all their cash benefits due and credited by issuers, and in case their dividends have not been credited, the reason for non-disbursement will also be available.

As an additional facilitation, CDC has also arranged to send the Dividend/Zakat & Tax Deduction report (counterfoil) via email attachment to all the shareholders of the companies whose information has been entered in our repository. CDC also provides a consolidated report to the shareholders of all cash disbursement in a financial year such as dividend rates, net dividend paid, tax and Zakat deductions etc. With all details available through a single source, this newly developed facility will enable shareholders to keep track of withheld dividends (if any), and maintain history of all cash benefits availed besides many other features.

- **Investor Protection and Awareness related activities**

CDC has always been proactively working on various initiatives to promote awareness as well as to provide tools to investors for safeguarding their interests. Investor Protection CDC has always given paramount importance to safety and security of client's assets. In this regard, it carries out various inspections of Participants with enhanced scope and coverage of 100% sub-accounts which includes on-site and off-site inspections. As per Joint Inspection Regulation 2015, CDC is entrusted with the leading role of inspection. CDC also performs periodic activities to ensure investor protection which include Circularization of Account Balance Statement to all Sub Account Holders, active surveillance and monitoring activities.

- Element Training Program (ETP) 2018

CDC conducted its flagship Element Training Program in Karachi, Lahore and Islamabad. This biennial training aimed at providing CDS Elements information about the latest developments in the system as well as the procedures and regulations to be followed in respect of CDS operations. The sessions also offered our valued clients an opportunity to refresh their understanding about the roles and responsibilities that result from their association with CDS and direct access to CDC personnel for resolution of any queries or concerns.

- Awareness Programs

As part of CDC's endeavors to spread awareness about the risks and opportunities regarding investment in Pakistan Capital Market, CDC representatives visit different cities across Pakistan and conduct investor education seminars once a month. This year, Investor Education Seminars were held in the cities of Karachi, Lahore, Faisalabad and Rawalpindi / Islamabad which were attended by Sub Account and Investor Account Holders who lauded this initiative for investor awareness. The events were extremely interactive and discussed the latest developments in Capital Market processes and regulations as well as CDC's role in ensuring investor protection.

- Support in Investor cultivation

A series of Investor Awareness Seminars was conducted as part of CDC's collaborative efforts with Pakistan Stock Exchange Limited (PSX) and Al Meezan Investment Management Limited. These seminars were organized for residents of Sialkot, Gujranwala, and Karachi to provide in-depth understanding about Islamic investment options available in Pakistan Capital Market.

- **International**

- Vice Chairmanship of Executive Committee of Asia Pacific Central Securities Depository Group (ACG)

Mr. Aftab Ahmad Diwan, CEO – CDC was selected Vice Chairman of Asia Pacific Central Securities Depository Group (ACG). This honor came to Pakistan in the 14th World Forum of CSDs (WFC 2017) Conference held in Hong Kong from November 14 - 17, 2017. ACG is a representative forum of all the depositories and clearing houses of the Asia-Pacific region. The group comprises of 34 CSDs from 23 countries. ACG is also one of the five members of World Forum of Central Securities Depositories (WFC), which is the global body of depositories and clearing houses, representing all the five regions, namely Asia, Europe, Middle East & Africa, Americas and CIS states. As Vice Chairman of ACG, Mr. Diwan also represent the Asian region on WFC Board. This recognition is an honor for Pakistan, as only two depositories from Asian region are present on the World Forum, which are CDC Pakistan and KSD Korea.

- CDC organized 14th WFC Conference

The World Forum of Central Securities Depositories (WFC) Conference is the global forum of depositories. CDC was one of the organizers of the WFC2017 Conference held in Hong Kong. The WFC conference is a global biennial event that offers an information sharing and networking platform for leaders of central securities depositories and clearing houses, regulators and custodians including international banks from across the globe. CDC organized this conference along with CSDs of China, India and Hong Kong. CDC was also responsible for agenda setting of the conference. More than 250 delegates from 58 countries and region participated in the event.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

New system enables individuals to purchase government bonds on-line, directly from the Government. Service points of the Treasury direct will be still operating, in parallel with on-line system, providing off-line access to the services given by on-line system, as well as registration on the on-line system in case the investor doesn't have an ID card.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

In 2017 in frameworks of the National Bank's Short-Term Notes Placement project using a "blockchain" technology the Central Securities Depository developed the Rules of Maintaining the Short-term Notes Holders Register System of the National Bank of the Republic of Kazakhstan Distributed Among Individuals. This project enables individuals to run buy and sell online operations of short-term notes of the National Bank via mobile application.

In the meantime, in order to obtain an accurate information of correspondent banks and to transmit information upon requests of other participants the Central Securities Depository became a participant of SWIFT KYC Registry in June 2017.

In September 2017 the Central Securities Depository introduced an AML/CFT new module as a part of AIS Depository Settlement Securities System.

Moreover, to arrange convenient optional link of electronic data interchange with informing persons of the Central Securities Depository using modern technologies the Central Securities Depository developed personal online cabinet in November 2017.

❑ BASIC INFORMATION

☐ MOST IMPORTANT EVENTS DURING THE PAST YEAR

Significant events that influenced the development of Central Securities Depository Prague in the previous year:

- Crucial projects included the preparation of groundwork within the licencing procedure in accordance with the European Central Securities Depositories Regulation. CSD Prague applied for authorisation with the Czech National Bank on 27 September 2017 and the application contained more than 180 documents supporting our compliance with requirements. I assume that the licencing procedure could be successfully completed during 2018.

- As in 2016, CDS Prague experienced the growth of issuers, mainly share issuers, in 2017. This trend is connected with the government initiative for the achievement of higher transparency while drawing funds from public budgets and the required obligation of a dematerialised form with companies that participate in public procurement.
- CDS Prague's major successful projects and achieved goals include in particular the migration of foreign securities to the Euroclear international depository, the opening of our own account in the CERTIS payment system, the computerisation and higher proportion of automation when applying for LEI and ISIN codes, the extension of supported messages of the SWIFT international network in respect of internal settlement and the fulfilment of all conditions of the GLEIF international organisation overarching the LEI allocation and obtaining of accreditation in December 2017.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

In the reporting period, investment funds portfolios of the Kyrgyz Republic were accepted for servicing. In July 2017, in the market of government securities which are placed through the national Bank was re-concluded the agreement on the activities of CJSC Central Depository. CJSC Central Depository registered the transfer and confirmed the ownership of government securities issued by the Ministry of Finance of the Kyrgyz Republic.

CJSC Central Depository acts as a sub-depository at the primary auction of government securities in the National Bank, providing final settlements on transactions concluded by the non-banking sector (brokerage/dealer companies, insurance companies, investment or pension Fund management companies). As part of the implementation of the law of the Kyrgyz REPUBLIC "on mortgage-backed securities", CJSC Central Depository has developed a new software for registration and storage of the mortgage coverage register.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

During the past year Midclear has selected GMEX Group's wholly owned subsidiary, GMEX Technologies, to provide and implement its innovative AvenirClear CCP product as the core system of the first derivatives central counterparty (CCP) in Lebanon. The set-up of the CCP by Midclear represents an important milestone in the reinvigoration of the Lebanese Capital Markets, part of Lebanon's strategic plans for its economy and reconstruction. The derivatives asset classes covered include FX Futures, Equity Index Futures & Options, and Commodity Futures, including precious metals.

The addition of a CCP will ensure the efficiency and effectiveness of the operations in this market, and provide safeguards for members, traders and investors.

Custodian and Clearing Center of Financial Instruments for Lebanon and the Middle East (MIDCLEAR) SAL

www.midclear.com.lb

Lebanon

AvenirClear CCP provides Midclear with an advanced real time risk management, and clearing and settlement platform that is fully compliant with the CPMI-IOSCO Principles for Market infrastructures (PFMIs).

In addition, Law 75 dated October 27, 2016 prohibited the issuance of bearer securities. Furthermore, law 75 stipulated that all existing bearer certificates have to be exchanged for nominal certificates within a period of one year.

□ MOST IMPORTANT EVENTS DURING THE PAST YEAR

- 2017 was the conclusion of negotiations with Nasdaq, which led to an alliance that will allow DCV to take a big step in modernization of its custody and securities settlement systems.
- The annual certification process of ISO 22301 Business Continuity Management Standard (BCMS) of DCV was performed successfully, with 3 years' validity.
- The Internal Audit and Compliance area of the Company received the International Quality Certification, the certification was conducted by the Institute of Internal Auditors of Spain, authorized by the Global Institute of Internal Auditors (IIA Global), the world's leading authority on this matter.

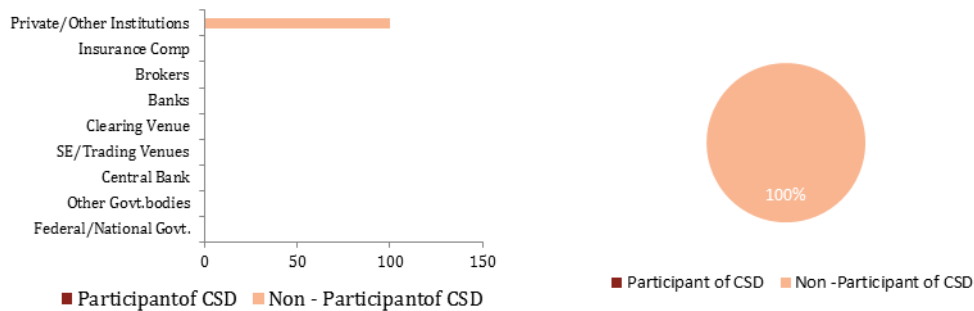

- DCV complied with the monitoring and testing process of the Crime Prevention Model (Law No. 20,393).
- The evaluation and study of DCV quality services continued. The clients answered on a scale of 1 to 7, to indicate their perception about the performance of DCV systems and services. The results show an average score of 6.4, where 88% of the answers lie in the range of score between 6 and 7, ranking once again the services of the Company in levels of excellence.
- The Company completed important business projects, some of which have had a major impact and benefit for the Chilean securities market. We emphasize the support given by the Central Bank of Chile to the modernization project of the electronic platform of SOMA system and adherence to the ISO 15022 standard, which included the purchase and sale modules, creation of instruments and in a relevant way, the start-up of the service of Special Pledge. Similarly, during the year the projects corresponding to the service of contribution and rescue of Mutual Funds Shares with financial instruments, new service of contribution and automatic withdrawal of OSAs, automatic reporting DCV Registros, among others, were released to the market.
- During 2017, DCV held important marketing events for its customers and the Company was also the host of a global event of one of international organizations of which it is a member. Among the events we highlight: the service quality event for operators, seminar on innovation and a look to future, hosting of ANNA extraordinary meeting (Association of National Numbering Agencies). Likewise, the DCV, for the first time, participated actively in financial education fair organized by the Superintendence of Banks and Financial Institutions.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

DTC is committed to providing solutions that reduce risk and increase transparency across the industry. Below are some examples of how DTC is delivering upon key initiatives to strengthen the security and resiliency of the capital markets, pioneer new industry-wide post-trade solutions and increase the value of our existing services.

- Began industry testing of “Night Cycle Reengineering,” the first component of Settlement Optimization, which will improve night settlement rates to lower risk and exposure. Implementation is scheduled for 2019.
- Continued collaborating with an industry working group to further improve early settlement rates to drive settlement finality.

- Advanced efforts to offer an alternative DTC settlement process for Continuous Net Settlement Transactions (CNS) to reduce intraday funding needs and NSCC margin requirements, with the final proposal expected by the end of 2019.
- Launched paper detailing DTCC's vision for the evolution of the U.S. equities market structure, unveiling a series of proposals to provide seamless access to new shortened settlement processing options, both pre-and post-trade.
- Delivered new white paper with Oliver Wyman to further industry dialogue around cybersecurity resumption and resiliency, a paper with the International Securities Servicers Association (ISSA) outlining current cybersecurity offerings and their risk management capabilities, and a paper with the Institute of International Finance (IIF) to further educate supervisors on the need for regulatory coordination.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

Depozitarul Central implemented EU standards for corporate actions processing, as of 1st of February 2017 and provides to issuers and participants a new application for transmitting the information regarding the corporate events of securities for which Depozitarul Central acts as the issuer CSD. Through this application, the issuers transmit in a standardized electronic format the corporate action details.

Depozitarul Central joined the Pan-European Settlement Platform T2S in June 2015 in the first wave, and in February 2016 implemented the automatic interface through which its own system communicates with the platform developed by the Eurosystem. TARGET2-Securities (T2S) facilitates the post-trading operations by offering harmonized, neutral and simplified settlement services in European single currency, for the majority of European

financial instruments. Starting on 18 September 2017, Depozitarul Central provides the T2S settlement service for the euro transactions concluded at the Bucharest Stock Exchange (BVB) with euro denominated financial instruments.

Depozitarul Central submits Application for Authorization under CSDR (EU Regulation 909/2014 on improving securities settlement in the European Union and on central securities depositories), a project that will change the whole architecture of the capital market.

Starting with July 2017, Depozitarul Central assigns FISN (Financial Instrument Short Name) codes, in accordance with the ISO 18774 standard and the ANNA Guidelines, for all Romanian financial instruments.

Depozitarul Central is in the final step of the authorization process as a Local Operating Unit (LOU) for the assignment of LEIs (Legal Entity Identifiers)

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- In a successful manner, the EDV organized and hosted the XIX General Assembly and International Seminar of the Association of Depository Centrals of the Americas (ACSDA). For the first time, La Paz-Bolivia hosted the most important international event of the association. Opportunity in which the EDV had the privilege of receiving and assisting representatives of Deposit Centers from 32 countries, from Canada to Argentina, including the Caribbean and invited countries from Asia, Africa and Europe.
- Signature of agreement with the International Financial Information Agency Thomson Reuters for the sending of information of securities registered and guarded by the EDV for worldwide dissemination.
- Implementation of the new version of the CFI code and assignment of FISN codes to the current values registered in the EDV.
- Creation and Registration of a new Value Class "Participatory Bonds (BPBS)" for SMEs in the EDV system

MOST IMPORTANT EVENTS DURING THE PAST YEAR

On 1 October 2018, EUI implemented model 1 DvP in central Bank money for USD, thus ensuring all payment currencies in CREST (GBP, EUR and USD) are in central bank money and conforming to the principles of CPMI IOSCO. This model was enabled by the Federal Reserve Banks authorising EUI to be the first non US financial market infrastructure to have access to the National Settlement Service (NSS).

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- **Regulation (EU) 909/2014 (CSDR)**

ATHEXCSD participates actively in the adaptation of the Greek capital market to Regulation (EU) 909/2014 (CSDR), particularly as concerns the timely licensing of the company, in accordance with the Regulation, within 2019.

- **Automatic Exchange of Financial Information**

The relevant actions and projects relate to

- The agreement between Greece and the United States for the implementation of the Foreign Account Tax Compliance Act (FATCA) and
- The Multilateral Competent Authority Agreement - OECD (Common Reporting Standard).

- **Electronic Book Building services**

The Electronic Book Building (EBB) service, offered in collaboration with ATHEX, provides the necessary logistical support to issuers that wish to raise capital from investors. ATHEXCSD provides issuers with notary, DVP settlement and various informational services and ATHEX with informational and software services such as software development and maintenance, user access and development of custom algorithms.

- **LEI services**

In response to the increased demand for issuing LEI codes as part of the implementation of the MiFID II and MiFIR, ATHEXCSD established and provided relevant services successfully. During the last two months of 2017, more than 800 new LEI codes were issued for legal entities, including listed companies, ATHEX Members and CSD Participants, in collaboration with LSE.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

The Hong Kong Monetary Authority (HKMA) and the People's Bank of China jointly launched Bond Connect in July 2017. Northbound Trading came into operation in the first phase, enabling overseas institutional investors to invest in the interbank bond market in Mainland China through cross-border financial infrastructure linkages between the CMU of the HKMA and other institutions of Mainland China and Hong Kong. Operation of Northbound Trading has been smooth, with daily turnover averaging RMB2 billion and more than 240 investors participating in Bond Connect up to the end of 2017.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

INTERBOLSA submitted its CSDR application in September 2017, and the application was considered complete in January 2018. The approval process was conducted in close cooperation with the CMVM, as well as the Banco de Portugal (the Portuguese Central Bank) and the European Central Bank. .

With effect from 12 July 2018, INTERBOLSA has been granted a license to operate according to the new European CSD Regulation (CSDR). INTERBOLSA is among the very first CSDs in the EU to be re-authorised under CSDR.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

By end 2017, discussions regarding updated business requirements that are geared towards taking advantage of new technological developments to address stakeholder requests for new functionalities, were at an advanced stage with our CSD system developer.

The scheduled upgrade will facilitate the implementation of reform measure under the 36-month IMF Precautionary Stand-by Arrangement with Jamaica and enhancements aimed at improving the effectiveness and efficiency of monetary policy actions by the Central Bank. In that regard the upgrade will include, *inter-alia*,

- a) the dematerialization of Government of Jamaica (GOJ) Treasury Bills,
- b) the automation of FX and Repo auctions by the Bank and
- c) Market valuation of the instruments in the system.

The project will be implemented on a phased basis and is scheduled to be completed by end 2019.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- In order to minimize the impact on relevant organizations in the event that the main office (Tokyo) becomes inoperable due to a wide-area disaster or local damage, JASDEC has established an alternative office at a remote location (Osaka) and has begun operations in which the multiple offices (Tokyo and Osaka) share the important operations in normal times.
- At the time of BCP activation, Osaka office will continue high-priority critical operations, and will conduct disseminating information on our group's operational status and responding to inquiries from outside, instead of the main office.
- In order to build a more reliable and efficient settlement systems, JASDEC is also working on "JASDEC 2020 Project" which started the previous year. This project aims to promote overall optimization of operations and systems, in connection with the replacement of the book-entry transfer and other systems scheduled to be implemented in 2020.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- 2017 was an eventful year from a political and economic environment perspective and it brought both domestic and international regulatory changes with substantial influence on the financial infrastructure.
- Related to the strategic development objectives of the following years, it is also of great importance that the successful joining of the TARGET-2-Securities (T2S) system, as of 6 February 2017, KELER is now a member of the European settlement security system. The entry into T2S makes securities transaction settlement more secure and efficient, and also improves international access to Hungarian securities.

- Changes in the regulatory environment presented challenges to all depositories in the European Union. In line with the requirements of the CSDR (Central Securities Depositories Regulation), KELER started the required re-authorization process in 2017 related to the provision of central securities depository and banking-type ancillary services. KELER submitted the application for re-authorization under the CSDR to the Magyar Nemzeti Bank, the competent authority on 29 September 2017.
- In 2018, in line with KELER's strategic objectives, after closing the related developments, it created a direct depository link with Krajowy Depozyt Papierów Wartościowych (KDPW), the Polish national depository. Therefore, related to Polish securities market transactions, KELER and KDPW jointly offer clients improved terms and service elements. The new service model combines outstanding security provided by the direct depository link and the services of a professional custodian with deep knowledge of the local market.
- In January 2018 KELER has launched its MiFID II. reporting service pack. Through this step, KELER Group helps its Clients in fulfilling their new reporting obligations. Currently KELER offers solution for fulfilling reporting obligations under EMIR, REMIT and MiFID II. as well, being the only Central Securities Depository providing such services together.
- It deserves highlighting that KELER as a service provider offers considerable assistance to market players in both the capital and the energy markets to meet the various regulatory, transaction and transparency reporting requirements with the extension of the Trade Reporting services offered by KELER. These developments and the continuation of the Strategic Modernization Program, the improvement of account management and settlement systems contribute to the creation of the expanding service offering of the modern national central securities depository and the implementation of its vision.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

During the weekend from 3-5 February 2017 LuxCSD successfully migrated to the ECB's TARGET2-Securities (T2S) platform. The implementation was a full success. This important strategic project has been conducted in close partnership with the European Central Bank, the Banque centrale du Luxembourg as well as other National Central Banks and participating Central Securities Depositories (CSDs) over many years. It forms an important pillar in the vision of a Capital Markets Union and contributes to the integration of the European financial market infrastructure by further improving the stability and integrity of the European market.

Following the migration, customers are able to benefit from LuxCSD's T2S offering, which enables them to profit from unique economies of scale as well as improved liquidity and collateral management via the new platform.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

In 2017, NCSDI continued to focus on preparations for the adoption of the European CSDR Regulations *(CSDR) in Iceland the implementation of a new CSDR compliant Securities Settlement System. The project is a big challenge for NCSDI and its participants, who will have to adjust processes and procedures, upgrade IT system and train employees accordingly.

The near term strategic priority of Nasdaq CSD Iceland (NCSDI) is to ensure compliance with the EU CSDR regulation by merger with Nasdaq CSD, implementation of the Depend CSD system and extension of Nasdaq CSD's CSDR authorization to Iceland. In parallel with the implementation of the Depend CSD solution and merger with Nasdaq CSD, NCSDI will pursue expansion of its service offering by offering EUR issuance and settlement and more standardized corporate actions services to issuers. By implementing the Depend CSD solution NCSDI will be able to provide standardized and more secure DvP solution which will open up opportunities for further indirect or direct participation of foreign participants in the CSD

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- During 2017, a significant part of the activity of the Management Board of PJSC "NDU" was aimed at the realization of a project on the implementation of a new software and technical complex for depository servicing by CSD.
- The Concept of New Software for CSD and the Basic Requirements for the technical task for the Introduction of New Software were approved.
- On November 24, 2017, the Supervisory Board of PJSC "NDU" has decided to give consent to the conclusion of the significant agreements with Persival Software Limited regarding the purchase of software and technical complex for depository service

- In December 2017, between NDU PJSC and Persival Software Limited the Early Start Agreement was signed within which preparatory project working has been started before the conclusion of the Basic Software Supply Agreement and the Hubble messaging solution.
- In order to ensure the continuity of provision of services to CSD's clients in cases of force majeure circumstances, under which the main Data Center will not be able to provide services to its customers, and for the protection of information in the depository record keeping system the Reserve Center for data processing was created. In November 2017 it was run into work. During November -June 2017, the reservation of all major business systems of PJSC "NDU" was executed in the Reserve data center.
- During 2017 PJSC "NDU" took part in the development of amendments to the legislative base that regulates the conduction of depository activity, and also initiated a series of legislative changes aimed at introducing new services of the CSD.
- During 2017 the following services were implemented:
 - Processing of the securities squeeze out procedure;
 - Sending notifications to shareholders through the depository system of Ukraine;
 - Service for the temporary safekeeping securities of owners on the issuer's account on the basis of the agreement with the issuer of the depository institution that terminated the depository activity;
 - Provision of a list of securities issues the rights to which are accounted for by unclosed securities holders accounts and the information contained in the databases of depository institution/custodian which have terminated the depository activities and were transferred to storage of the CSD.
 - Services for the approval of the candidature of the depository institution - the assignee
 - Transfer of databases / archives of databases / documents / funds stored in the CSD as authorized for storage.
- PJSC "NDU" in cooperation with market participants developed a draft law "On Amendments to certain legislative acts of Ukraine in attracting foreign investments ", which envisages the introduction of the concept of a nominee holder in Ukraine, which has been adopted in many countries of the world.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

NSDL CAS: NSDL CAS is a single account statement consisting of transactions and holdings in an investor's demat account(s) held across two Depositories as well as in units of Mutual Funds held in Statement of Account (SOA) form. The statement enables investors to have a consolidated view of their financial assets and provides insight of their portfolio across various asset classes. NSDL CAS provides investors enriching experience of effectively managing their portfolio effectively and benefit them in many other ways such as better decision-making, simplified monitoring, rich analysis of portfolio, and so on.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

Since last year Indeval has been working in conjunction with SWIFT on the Alliance Message Hub (AMH) project, in order to automate, modernize and reach global standards to process information and transactions. AMH is a modular, multi network, high-volume financial messaging solution that is highly available, customizable and scalable.

- Cater for ISO standards and meet growing message volumes
- Performance – the system can accommodate significant increases in processing volume with no performance impairment
- Higher straight through processing rates with increased agility and efficiency.

The Project consists of 3 phases, 2 of them already implemented:

Phase 1: Stock Exchanges

- Receive and process via SWIFT Information related to all Corporate Actions for the securities listed at SIC
- Automation to receive from Markit and deliver to the Stock Exchanges.

Phase 2: International Custodians

- Settlement of transactions, confirmations, corporate actions, statements.
- Direct Communication with international custodians

Phase 3 (on going): Local Participants and FFI

- To establish a facility for communication between banks and other financial institutions in a safe and effective environment reducing costs and risk associated with post-trade operation.
- Participants will access our range of services: settlement, asset servicing, and securities lending.

❑ BASIC INFORMATION

- **Regional Association** : AMEDA
- **Local Currency** : Jordanian Dinar (JOD)
- **Conversion rate into USD** : 1 USD = 0.710 JOD (31-Dec-17)

❑ OWNERSHIP (AS ON 31-Dec-17)

- **CSD is not a part of group of infrastructure of stock exchange, central bank or holding company that owns other FMI.** The Securities Depository Center (SDC) is a public utility institution, founded by virtue of Securities Law where it is not owned by any entity.
- **Shares of CSD or holding company are not traded publicly.**

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

In 2017:

- The SDC adopted the National Center for Security and Crisis Management (Military Site) as an alternative backup site for the SDC's operations to guarantee the continuity of operations in all circumstances according to the international standards and best practices and to complete the SDC's measures of risk management.
- The SDC implemented the new developed Settlement Cycle to introduce the custodians to the settlement that allow them to settle the trades of their clients directly with the SDC on a delivery-versus-payment (DvP) basis. Accordingly, the SDC issued new legislations.

In 2018:

- The SDC launched the e-portfolio service which uses the latest technologies in the web world and compatible with smart devices. This service enables the investor to view the investor information at the SDC, his securities accounts maintained with brokers and custodians, his balances of securities which is updated daily and transactions executed on the investor's securities accounts.
- The SDC won the membership of the (ANNA)'s Board of Directors.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

- **FMIA/FMIO:** With the passing of the Financial Markets Infrastructure Act and Ordinance (FMIA and FMIO, reflecting EU's EMIR), SIX SIS changed its licensing status from a licensed bank to a licensed CSD in October 2017. The banking license previously in force was returned. SIX SIS remains subject to supervision by FINMA and the Swiss National Bank with regard to services of systemic importance. Apart from segregation which directly affects clients (Article 73 FMIA), FMIA does not change anything with regard to SIX SIS's service offering. Regarding segregation in particular, SIX SIS has made all the necessary changes to enable clients to fulfil their obligations under FMIA.

- CSDR: SIX SIS will not apply for a CSD license under CSDR since it is not an EU CSD. However, it is targeting recognition by ESMA as a third-country CSD according to Art. 25 CSDR. In order to obtain such a recognition, SIX SIS is dependent on a positive assessment by the EU Commission with regard to the regulatory regimes of Switzerland and the EU. Since SIX SIS is also the CSD for Liechtenstein, which is part of the European Economic Area (EEA) and must therefore fulfil the regulation enacted by the EU, it submitted the application for recognition as a third-country CSD for Liechtenstein in September 2017.
- Legal Entity Identifiers (LEIs): SIX entered into a partnership with DTCC to offer Legal Entity Identifiers (LEIs) for Swiss entities in 2017. The LEI was devised to provide insight into corporate entities with the aim of reducing cross-platform risk exposure. LEIs will help regulators and market participants to aggregate and better understand their exposures, enhance market transparency and significantly improve the analysis of global systemic risk. This partnership comes as Europe implements MiFID II on 1 January 2018. The new regulatory mandate will require all legal entities involved in a trade to include LEIs in their European trade reporting.
- Trade Repository: The SIX Trade Repository, the only FINMA-approved Swiss trade repository, has on-boarded more than 150 Swiss institutions onto the system. The company met all reporting obligations for small financial counterparties and large non-financial counterparties by the end of 2017. Based on the FMIA, all companies with a registered office in Switzerland are obliged to report their derivative transactions to an authorized trade repository.
- Group Structure: In November 2017, the Board of Directors of SIX decided to make strategic and organizational changes to ensure the business is well-positioned. This strategic realignment focused on the needs of SIX clients, shareholders and the requirements of the Swiss financial center. SIX now focuses consistently on infrastructure services for the securities business, payment transactions and financial information. One of the main elements of this realignment was bringing together all securities-related activities into a single unit. This meant merging the exchange trading and post-trading businesses into one single organizational unit: Securities & Exchanges. Hence, SIX operates four business areas such as Securities & Exchanges, Financial Information, Banking Services and Innovation & Digital. The business unit Cards will be brought into a strategic partnership with Worldline, an European leader in the payments and transactional services industry, while SIX will maintain a 27% stake in Worldline.
- Security Operations Center (SOC): SIX opened Switzerland's first Security Operations Center (SOC), which is based on cognitive computing, i.e. self-learning technology from IBM Watson. SIX is to open up its SOC and share these capabilities with institutions of the Swiss Financial Center, focusing on banks and insurances as a Managed SOC Services Provider (MSSP). The new Security Operations Center (SOC) provides cyber-security

services by elaborating cyber-security insights derived from a library of over one million known threats. The SOC has access to the latest security tools and is a leading defender against cybercrime. Hence, the SOC is a specialized cyber security competence center which works 24/7, monitors infrastructures, applications, suspicious behaviour's and data centrally and searches for indicators of cyber-attacks.

❑ MOST IMPORTANT EVENTS DURING THE PAST YEAR

In 2017, in order to comply with the CSDR regulation (UE), KDPW implemented required organisational and technical changes and filed a CSDR license application to the Polish Financial Supervisory Authority in September 2017.

A DVP operational link from Clearstream Banking Luxembourg to KDPW was opened at the beginning of 2017.

Since the beginning of 2017 KDPW_LEI issues LEI codes for Polish and foreign financial and non-financial counterparties.

A new system for intermediation in passing transaction reports to the Polish FSA, Approved Reporting Mechanism, described in the MFID II regulations, was launched in December 2017, when KDPW started to onboard new participants to the system.

In 2017, KDPW launched a pilot project to recognize a blockchain technology and prospects of its usage to deliver a new KDPW e-Voting service. The project has been continued and the production phase is planned.

A new service was launched in June 2017, making it possible for KDPW participants to deposit securities as a collateral towards other participants on a segregated, assigned securities account.

In September 2017 Polish Central Bank opened for KDPW a DCA (Dedicated Cash Account) in the TARGET2-NBP system, to enable the receipt of EUR payments related to operational links which KDPW has with Eurozone CSDs.

In November 2017 KDPW introduced basic Settlement and Reconciliation messages in ISO20022 standard, to be used by participants parallelly to proprietary KDPW xml messages and SWIFT ISO15022 messages.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

Efficiency: In September 2017, CDS Clearing announced the successful transition to a two day securities settlement cycle (T+2) from the previous three day cycle (T+3). The move provides significant benefits to CDS's client base by enabling participants better to mitigate counterparty, market, and liquidity risks by reducing both outstanding settlements and the associated replacement cost risks.

Innovation: Our technology modernization program accelerated throughout 2017 and, working with our strategic partner Tata Consulting Services, we are nearing completion of the initial phase of what is a multi-year initiative.

International Operations: CDS is continuously working to strengthen existing relationships with our global partners and to pursue new relationships and linkages around the world. We are excited about the potential benefits we can derive from our relationship with the Shanghai Clearinghouse, as we work to facilitate access to the Chinese inter-bank bond markets. We hope to launch services later in 2018.

MOST IMPORTANT EVENTS DURING THE PAST YEAR

- Getting the CSDR License
- Going live on T2S with DKK

DEFINITIONS & ABBREVIATIONS

- **Beneficial Owner:** An account structure where securities are held at the level of the individual end-investor.
- **Cash Account and other Cash Services:** CSD provides Cash account maintenance and FX services.
- **Funds Order Routing Platform:** CSD provides platform to investors to place their order of subscription, redemption, and other type of orders for funds
- **Collective Investments Vehicles (CIV) (i.e. Funds):** Securities representing a portion of assets pooled by investors run by a management company whose share capital remains separate from such assets and includes issues of shares or units in the form of a unit trust, mutual fund, OICVM, OPCVM, SICAV, SICAF, and so on. Collective Investment Vehicles include the following: (a) Standard Investment Funds/Mutual Funds, (b) Hedge Funds, (c) Real Estate Investment Trust (REIT), (d) Exchange Traded Funds (ETF), (e) Pension Funds, (f) Funds of Funds, and (g) Private Equity Funds.
- **Corporate Action Events:** Corporate action events which either result into debit or credit of securities in the accounts maintained by CSD or cash entitlement processed by CSD to credit the account of Client in case of beneficial owner account or participant in case of omnibus account.
- **Crowdfunding Platform:** CSD provides infrastructure for crowdfunding market and supports the development of the crowdfunding market, by providing services to issuers, investors, intermediaries, and supervisory authorities through crowdfunding platform. Crowdfunding platforms facilitate issuers and investors to check issuance or investment limits, and members of the general public interested in crowdfunding to access related information and statistical data.

DEFINITIONS & ABBREVIATIONS

- **Debt:** Financial instruments evidencing monies owed by the issuer to the holder on terms as specified. Debt includes the following: (a) Bonds (b) Convertible Bonds (c) Bonds with Warrants Attached, (d) Medium-Terms Notes, (e) Money Market Instruments, (f) Structured Instruments (capital protection), (g) Structured Instruments (without capital protection), (h) Mortgage-Backed Securities, (i) Asset-Backed Securities, (j) Municipal Bonds, and (k) Depository Receipts on Debt Instruments.
- **Dematerialised form of securities:** ‘Dematerialised form’ means that the financial instruments exist in the records of the CSD. The issue is usually documented by a record maintained by the issuer or a CSD or some other intermediary. The securities issued are credited to securities accounts.
- **Equities:** Financial instruments represent an ownership interest in an entity or pool of assets. Equities include the following: (a) Common/ordinary shares, (b) Preferred/preference shares, (c) Common/ordinary convertible shares, (d) Preferred/preference convertible shares, (e) Limited partnership units, (f) Depository receipts on equities, and (g) Structured instruments (participation).
- **e-Voting Platform:** CSD provides an e-Voting Platform to the issuers.
- **Full-Time Employees:** Employees who are on the payroll of the CSD or directly attributable to the CSD in another (group) legal entity. Part-time employees should also be counted as full-time employee numbers by converting them into full-time equivalents (*e.g. two employees working part-time for a half day each should be considered as one employee*).

DEFINITIONS & ABBREVIATIONS

- **Immobilised Form of Securities:** Immobilisation involves concentrating the holding of securities in a CSD. The deposit of securities may be done in the form of individual certificates, a combined certificate, known as a global or jumbo note/certificate which represents all or part of the securities of a particular issue, or a letter by the issuer evidencing entrustment of a certain quantity of securities of a specific type. Transfers of immobilised securities thus can take place by electronic book-entries by intermediaries and do not require actual movement of certificates.

Immobilisation is hence the act of concentrating the holding of securities certificates with a depository to allow the crediting of an equal amount of securities to securities accounts and the transferability of such securities by way of book entry.

- **Information Services:** CSD collects securities, corporate actions, and issuers and registrars information from different sources and distributes it in a customised and structured way via online database and/or via the website.
- **Legal Entity Identifier (LEI) Services:** CSD assigning Legal Entity Identification (LEI) codes.
- **National Numbering Agency Services:** CSD is authorised to allocate the ISIN, CFI and other international codes.
- **Omnibus:**
 - Omnibus Account Structure: Securities for more than one client are comingled within the account(s) of Intermediaries.
 - Segregated Omnibus Account Structure: An omnibus account allowing for segregation of individual CSD participant clients' assets.
- **Others instrument:** All other instruments that do not fit in Equities, Collective investments vehicles and Debt as defined above.
- **Other CSDs:** CSD that is incorporated in the same Jurisdiction as well as other jurisdictions.

DEFINITIONS & ABBREVIATIONS

- **Participant:** Participants include any entity having signed an agreement of participation for operating accounts or for participation in the CSD settlement system. In a tiered system, custodian banks or other CSDs hold accounts with the CSD. In a non-tiered system, every private individual can have an account with the CSD. However, the accounts are operated by only a few companies that are the account operators. These are companies operating the accounts of (private) customers in non-tiered systems and are typically banks.

Participants do not include investors or issuers using the CSD's registration service or share transfer agents of issuers, or using CSD ancillary services that are not directly linked to their participation in the settlement system.

- **Domestic Participant:** Domestic Participants are those located (incorporated) in the same country as the CSD.
- **Non-Domestic Participant:** Non-Domestic Participants are those that are located (incorporated) in a different country than where the CSD is established.
- **Participant type:**
 - In case the same participant is a Custodian and also a Bank then mention the count under Custodian.
 - In case the same participant is Custodian and also a Broker then mention the count under Custodian.
 - In case the same participant is a Bank and also a Broker then mention the count under Bank.
- **Settlement Instructions:**
 - Number of delivery instructions from 1 January to 31 December.
 - This number covers all instructions to move securities between accounts.

DEFINITIONS & ABBREVIATIONS

- For trades not cleared by a CCP: data related to delivery instructions is reported on a gross basis (without netting). For trades cleared by a CCP: data related to delivery instructions is reported on a post-netting basis.

Delivery instructions include:

- Instructions to block (and un-block) securities for collateralisation purposes on a borrower's securities account with the CSD.
- Securities movements due to automatic securities lending or automatic collateralisation (including self-collateralisation).
- Delivery instructions to move securities from the participant's own account to his omnibus account and vice versa when there is segregation on a participant's account with the CSD.
- Delivery instructions related to the transfer of securities between two accounts of the same account operator in a non-tiered system.

Delivery instructions exclude:

- Instructions related to securities movements due to corporate actions (restructuring the ownership of a company through e.g. a stock split or conversion), new issues, and redemptions.
- Instructions related to purely technical bookings such as realignment procedures.

For the number of delivery instructions:

In principle, only delivery instructions are counted.

- An instruction to transfer two or more securities (ISIN or national codes) is counted as two (or more) instructions.
- If the CSD receives two instructions regarding the same trade (e.g. one from the seller and one from the buyer of the securities), only one instruction is reported (either the one of the seller or the one of the buyer, but not both of them). Further, when processing an instruction to transfer securities from a seller to a buyer requires two or more transfers, due to movement of

DEFINITIONS & ABBREVIATIONS

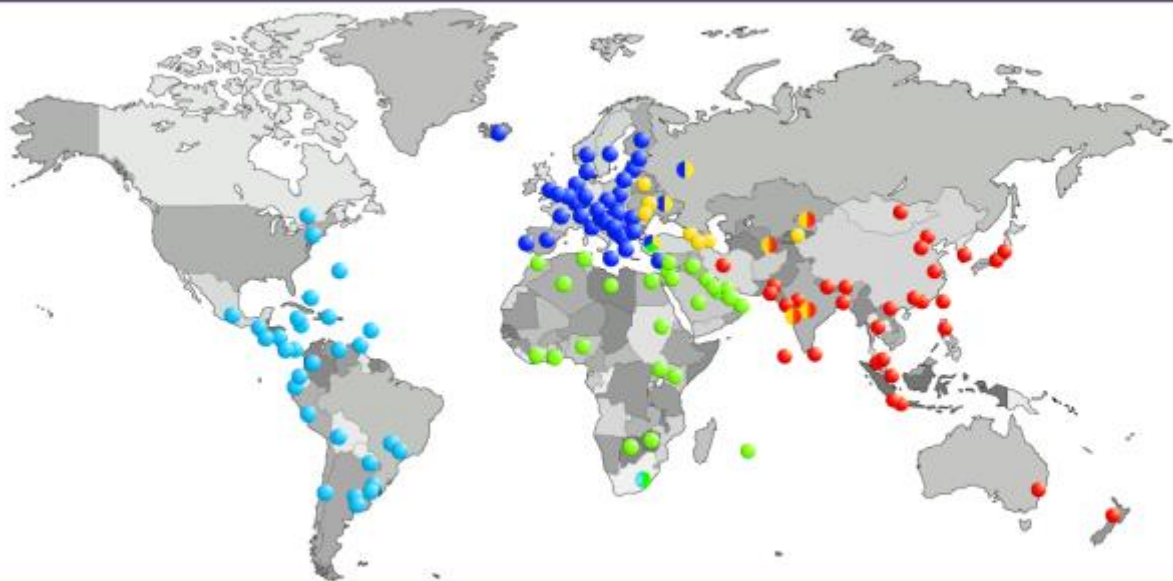

securities from (i) a client to a clearing member, (ii) a clearing member to a CCP, (iii) a CCP to a clearing member and (iv) a clearing member to a client, only one transfer is to be reported, preferably, from a client to a clearing member.

- For transfers through a link between CSDs, only the issuer CSD reports. When the issuing CSD is not involved (e.g. transfers through the “bridge”), only the delivering CSD reports.
- **Technological solutions:** CSD provides access to EDI systems, SWIFT, and/or outsourcing of IT services.
- **Trade Repository Services:** CSD provides services for OTC transactions reporting by market participants due to applicable laws and regulations requirements.
- **Triparty Services:** CSD offers its clients collateral management services for OTC transactions such as REPO, securities lending and derivatives.
- **Value of Deposit:** Market price as on the last business day of the calendar year should be considered for valuation. In case of collective investment vehicles per unit net asset value (NAV) or if market price is available then market price should be considered. When market price / NAV as of last business day of the calendar year is not available, then the latest available price should be used. In case instrument for which market price is not available face value should be used.
- **Valuation Services:** CSD provides an automatic system to calculate market prices of financial instruments.
